

Electrosensitivity Resources

Why haven't you heard about EMF Refugees?

There are a few reasons: First, once someone becomes severely EHS, they cannot be on a computer or "smart" phone. In our social media obsessed culture – this is like dropping off the map. Thus, someone who was once active with email, Facebook, Twitter, blogs or weekly cell phone calls may essentially have to drop all communication. Most people will think their Facebook friend is being distant and unfriendly. However, in reality they are trying to heal in nature. Some EMF Refugees can recover over time, but many others spend the rest of their lives outside of society.

Second, the percentage of severely affected people is currently low – less than 1% of the population. So, the odds of one of your close friends or family members being affected are not high (at least for now). However, 3-5% of people are moderately affected and another 25% are slightly affected by microwave radiation and electrical pollution. With the amount of EMF pollution in our lives growing exponentially every day, many more people will be affected in the near future. We are at the very beginning of what could be the health crisis of the 21st century. There is no telling who will be affected. A close friend or family member could be next. It could even be you.

Third, although some intrepid reporters have begun to cover the growing number of EMF refugees, the huge national media conglomerates have not touched the subject (out of sight, out of mind). This is likely because of the enormous economic implications of this growing social justice issue. If they have reported on EHS, it has been in a way that incorrectly paints EHS as a psychiatric condition. There are always going to be psychiatrists or physicists (with industry ties) to interview that will say EHS is a psychosomatic or nocebo-effect reaction to a perceived threat. However, if one asks a biologist or medical doctor with no vested interests, you can learn that there are [clear physical biomarkers](#) that prove [EHS is real](#) and a clear and present danger for society.

The Canaries in the Coalmine of our Time?

EMF Refugees are becoming the canaries of our age. But if you yourself rely heavily on wireless technology, live next to a [cell phone tower](#) or have a [smart meter next to your bedroom](#), EHS could affect you or a family member at any time. From that point forward, your life will not be easy.

There are many [steps you can take](#) to make sure that you do not become an EMF Refugee. And if you know someone who is starting to get headaches from their cell phone, Wi-Fi, computer, smart meter or local cell phone tower, share these [treatment options](#) with them. The more you learn

about this potent toxin and its impacts, the more you will help the growing number of EMF Refugees in our society.

Global EMF Quiet Zones for EMF Refugees

If you are an EMF Refugee, certain areas and countries throughout the world are starting to recognize the need to create Low-EMF zones for people with EHS. The following is a basic guide:

United States (Green Bank, West Virginia):

<http://www.bbc.co.uk/news/world-us-canada-14887428>
<http://www.youtube.com/watch?v=N8SelMsICrE>
<http://www.onthemedial.org/2011/sep/16/escape-wifi-national-quiet-zone/>
<http://www.wusa9.com/news/article/245588/158/Wireless-Refugees-Cell-Phones-WiFi-Making-Us-Sick>
<https://www.facebook.com/groups/571481532909496/>

United States (Arizona):

EHS & MCS Community near Snowflake, AZ
<http://www.kpfa.org/archive/id/95056>

United States (Colorado):

<http://www.emsri.org/>
<http://bcn.boulder.co.us/health/rmeha/rmehemsr.htm>
[EM Sensitivity Research Institute](http://www.emsri.org/) in Rockvale, Colorado

United States (Wisconsin):

Contact: Lynn Knapp

Email: dellkoprime@frontier.com

Message: I have dealt with Emf for 10 years and finally purchased a 22 acre in SW Wisconsin that is a safe zone, feels wonderful there! Looking to create small community with like folks that are dealing with Emf. Please contact Lynn @ 608 794 2619

North Carolina:

<http://hostelofthemountain.com/>

Going off-the-grid safely for EMF Refugees:

<http://www.electricalpollution.com/OffgridSafely.html>

<http://www.eiwellspring.org/offgrid.html>

<http://www.sunshineworks.com/faraday-cage-building-material.htm>

Global Map of Radio Quiet Zones:

Electrosensitive EMF Refugees

For every EM refugee story posted on web sites around the world, the personal story can be multiplied by many hundreds of thousands of unreported or misdiagnosed illnesses.

Just using round figures: There are now nearly 5 billion human beings living in high density urban centers in the modern world. Using the most conservative epidemiological figures amassed in the last ten years, nearly 5 percent of total urban populations have developed electromagnetic hypersensitivity. Do the math: That's 250 million people suffering a myriad of health related effects from a preventable and unneeded technology. The figures I'm using here are extremely conservative. The health care costs and loss of productivity of these persons in our societies is staggering.

How long will it be before the projections of epidemiologists get taken seriously? Recent studies project the number of persons becoming electrosensitive at a staggering 17% (by year 2016). Just using present day urban populations figures, that means 850 million people will most likely become unemployable, destitute, and homeless by 2016. Is your cell phone, wi-fi, and digital television idiocy worth the torture and eventual death of 850 million human beings?

The following are stories about EMF Refugees that have made it into the press. There are likely tens of thousands of additional stories that will never be told.

The Stories of EMF Refugees

Former telecommunications engineer is now forced to live in the woods: <http://www.popsci.com/science/article/2010-02/disconnected>

Priest who committed suicide after becoming an EMF

Refugee: <http://ehsfighback.blogspot.com/2014/02/when-priests-commit-suicide.html>

<http://bcn.boulder.co.us/health/rmeha/rmehemsr.htm>

United States (California):

<http://www.harbin.org/> Although not a true white zone, it is a good place for moderately affected individuals in a protected valley with no smart meters, wi-fi or nearby cell towers. There is also a no-cell-phone policy on property. Camp down by the creek and this can be a good short-term solution to help you heal. You can stay for up to one month.

<http://thequietdome.com/> A new research facility in the Sierra Nevada Mountains above Grass Valley. This place is expensive, but is free of EMF and chemicals. It is meant to help provide research for building codes that will help those affected by EHS and MCS.

The Quiet Dome in Northern California (Photo by R. States)

United States (Wisconsin):

Contact: Lynn Knapp

Email: dellkoprime@frontier.com

Message: I have dealt with EMF for 10 years and finally purchased a 22 acre in SW Wisconsin that is a safe zone, feels wonderful there! Looking to create small community with like folks that are dealing with EHS. Please contact Lynn @ 608 794 2619

United States (North Carolina): These are not perfect EMF safe zones, but very close:
